QUEENSLAND**Lot 82**

82	V	A+	1860 Large Star Imperf 2d blue SG 2 , margins good to large with complete outer framelines & fragments of the adjoining units at right & the base, light Rays cancel leaving the portrait virtually unobstructed, Cat £1800. Superb! One of the finest examples we have seen. [Fine examples of SG 2 are extremely elusive. In our opinion, they should be worth at least ten times the 1d & 6d, both of which are catalogued at £800. This stamp is far more attractive than <i>Bernie Manning's</i> two very fine singles that sold at the <i>Prestige</i> auction of 12.5.2007 for \$3335 & \$2185 respectively]	1,800
-----------	---	----	--	-------

**Lot 83**

83	*	B C1	1895 Void Background Perf 12½, 13 ½d green with Double Impression SG 208a , light horizontal crease, large-part o.g. with a hinge remainder, Cat £2000. <i>BPA Certificate</i> (2009). [The first print was quite faint & was obviously considered unsatisfactory. The strong second print is 2mm to the right. With a normal stamp for comparison] <i>Ken Scudder</i> at page 179 states "Clear double prints exist...probably all...from the same sheet of stamps". Until their 2010 Edition, this error was unpriced by <i>Gibbons</i> . From 2011, it was priced at £2000 unused or used, and has not budged since. This is stated to be the only unused example recorded . Considering that there are several used examples known, this stamp should be worth significantly more than the used examples. At a Swiss auction in 2003, a less dramatic used example sold for €24,225!	6,000

**Lot 84**

84	P	B	1896-1902 Figures in Lower Corners Only 6d imperforate proof in brown on ungummed unwatermarked wove paper BW #Q42(DP)1F, minor thinning at top, Cat \$3000 (2004). <i>Ex Bernie Manning</i> . [This is a progressive design with the spandrels in the lower corners represented by small white triangles only. The ACSC notes that such proofs were struck from a matrix die block of 4. They exist in 8 different colours; between 2 & 6 single examples of each colour are recorded. <i>Alan Griffiths'</i> similar proof in green sold in 2012 for £696]	750

Lot 85

85 V A B1 - 6d yellow-green BW #Q42A (SG 230) with unlisted variety *Damaged Upper Frame*, better perforated than many examples, light cds cancellation (probably 'PARCEL POST/BRANCH/ BRISBANE'), Cat \$35,000 (£16,000). **Possibly the finest recorded example of one of the great rarities of Queensland, and of the Commonwealth Period States issues.**

The ACSC advises that "...sixteen examples are recorded. The stamp was first discovered in 1903 shortly after issue...Most examples have the Parcel Post Branch datestamp...The dates range between April and November 1902...Most examples show characteristically rough perforations...Many of the stamps show defects of various sorts..." *Ken Scudder* at page 212 identifies 19 examples across the four sub-types. This is his Sub-Type 1 and is the stamp illustrated by him.

20,000

Lot 86

86 ** A+ B1 **REVENUES:** 1960 Impressed Duty with 'QUEENSLAND DUTY' Underprint in Pale Blue £5000 magenta, unmounted, *Elsmore Online* Cat \$6000. The highest denomination of any pre-Decimal Australian revenue issue. Superb!
