**Lot 237**

237 ** A - 30c Type A ('2016' printed 6mm from edge of stamp) strip of 5 - missing Two Kangaroos - with '**Adelaide 2016**' **Omitted** from the Bounding Kangaroo design. The only example we have seen. **[NB:** At the GPO, these stamps were pre-separated into strips of **10**, from which strips of the 6 designs were extracted. However, suburban POs were issued with strips of 5]

COMMONWEALTH OF AUSTRALIA - First Day Covers**Lot 277**

277 C A - 30c Type B ('2016' printed 7mm from edge of stamp) set of 6 tied to a plain unaddressed cover by 'SALISBURY/ 1 /8JAN2016/SA 5108' cds. [In January 2016, the base letter rate was raised from 70c to \$1. A shortage of 30c values in Adelaide resulted in an emergency printing using an old *Monarch* counter-printing machine & remainder stock of 1994 self-adhesives. These were distributed only to the GPO & some suburban post offices in Adelaide & were on issue for only a few days, pending arrival of regular 30c issues from *Stores Branch*. No publicity for or notification of the issue was given & no examples were provided to the *Philatelic Bureau* or otherwise for distribution to New Issue Service clients. Usage on commercial piece has been recorded on 6JAN2016 but no covers from either the 6th or 7th. Collectors became aware of the issue on 8.1.2016 on which date a mere 16 "FDCs" were processed]

NEW ZEALAND**Lot 1196**

1196 O A **2004 Olympic Games \$2 Peter Snell** with the *Laminated Lenticular Image Inverted CP #S918aZ*, apparently commercially used but uncanceled, on the reverse remnants of the red envelope from which it was removed, Cat \$NZ3000 mint; unpriced used. **An extraordinary and bizarre error, and the only used example known to us.** With a normal used example for comparison. [It's a surprise that such an idiotic production could even pass through the cancelling machines without being de-laminated, but the normal stamp proves this was possible]
